Test Methods

Weed Species: Broadleaf plantain (*Plantago major*)
 Turf Species: Bermudagrass, Annual bluegrass, Bentgrass
 Treatment Application Dates: 1. Oct. 5, 2009; 2. Oct. 30, 2009
 Commercial standard: Ortho Weed-b-Gon (2,4-D, dicamba, MCPP)
 Evaluation Interval: Percent phytotoxicity by weed species and turf variety. 1, 3, 7, 14, 25, 28, 35, 42, 56 days after trial initiation.
 Plot Description: 2.2 m² plots × 4 replicates per treatment in a randomized complete block design.

Conclusions: Both rates of Fiesta controlled broadleaf plantain weeds faster than Ortho Weed-b-Gon. With two applications, efficacy of Fiesta was equal to that of the competitor product.
