

FALL SEASON APPLICATION CONTROL BROADLEAF WEEDS

FIESTA[®]
LAWN WEED KILLER

Start This Fall for a Great Spring Lawn!

Control Broadleaf Weeds in the fall with Fiesta[®] Lawn Weed Killer.

The best times to treat weeds are in spring when they are small and growing and in fall to eliminate many of next year's weeds. Use Fiesta to reduce broadleaf weed pressure and ensure fewer weeds in the spring. Research at Ohio State University shows that a fall application of Fiesta provided excellent control of dandelion and very good control of white clover and broadleaf plantain.

Suitable for broadcast application or spot treatment, Fiesta Lawn Weed Killer is a selective, broadleaf weed killer that leaves turf healthy and weed-free using a specially formulated iron chelate solution that even controls moss and algae. Fiesta works quickly, delivering visible, same-day results, even in cool weather. It has no unpleasant odor during or after application. People and pets can reenter the treated area once the spray is dry.

Fiesta will not disrupt your fall seeding program since you can apply Fiesta the day before seeding. Fiesta was developed with sustainable practices in mind and can be used around pets and wildlife.

Broadleaf Herbicide Kills Weeds, not Lawns

Active Ingredient: IRON
(present as FeHEDTA) 4.43%

Controls or Suppresses Weeds such as:

- Algae
- Black medic
- Broadleaf plantain
- Bull thistle
- Canada thistle
- Common chickweed
- Creeping buttercup
- Dandelion
- Dove's foot geranium
- False dandelion
- Lawn Burweed
- Moss
- Narrow leaved plantain
- Prostrate knotweed
- Slender speedwell
- White clover
- Wild geranium

Features & Benefits

- Can reseed 1 day after applying
- Rainfast within 3 hours
- Works in cool weather
- Kills moss and algae
- See results in hours
- Effective alternative to conventional selective herbicides

Use Rate

Mix one part FIESTA with 24 parts water (40ml with 960ml of water).

Broadcast Treatment: Apply the mixed solution at a rate of 10-40 liters/100 m². Uniform coverage is important.

Spot Treatment: Thoroughly spray weeds to point of runoff using any standard handheld or backpack sprayer. Use a course nozzle setting to reduce drift. Repeat treatment in 3 to 4 weeks for best results.*

Available in:

- 4 liter jugs (4 per case)
- 10 liter jugs (2 per case)
- 800 liter tote

*Fiesta can often be used in areas where there are pesticide bans. Check with your local municipality if there is a pesticide ban in place.

Read and follow label instructions for use.
