

## FALL SEASON APPLICATION CONTROL BROADLEAF WEEDS

# FIESTA®

### TURF WEED KILLER

EPA Reg. No. 67702-26

## Start This Fall for a Great Spring Lawn!

Control Broadleaf Weeds in the fall with Fiesta® Turf Weed Killer.

The best times to treat weeds are in spring when they are small and growing and in fall to eliminate many of next year's weeds. Use Fiesta to reduce broadleaf weed pressure and ensure fewer weeds in the spring. Research at Ohio State University shows that a fall application of Fiesta provided excellent control of dandelion and very good control of white clover, broadleaf plantain and ground ivy.

Suitable for broadcast application or spot treatment, Fiesta Turf Weed Killer is a selective, broadleaf weed killer that leaves turf healthy and weed-free using a specially formulated iron chelate solution that even controls moss and algae. Fiesta works quickly, delivering visible, same-day results, even in cool weather. It has no unpleasant odor during or after application. People and pets can reenter the treated area once the spray is dry.

Fiesta will not disrupt your fall seeding program since you can apply Fiesta the day before seeding and just one week after grass emerges. Fiesta was developed with sustainable practices in mind and can be used around pets and wildlife.

### Broadleaf Herbicide Kills Weeds, not Lawns

Active Ingredient:  
Iron HEDTA 26.52%

### Controls or Suppresses Weeds such as:

- Algae
- Black medic
- Broadleaf plantain
- Bull thistle
- Canada thistle
- Common chickweed
- Creeping buttercup
- Creeping charlie/ground ivy
- Dandelion
- Dovefoot geranium
- English daisy
- False dandelion
- Healall
- Lichens
- Liverworts
- Moss
- Narrow leaved plantain
- Oxalis
- Persian speedwell
- Prostrate knotweed
- Shepherd's purse
- Silverweed cinquefoil
- Slender speedwell
- White clover
- Wild chamomile

### Features & Benefits

- Can reseed 1 day after applying
- Rainfast within 3 hours
- Works in cool weather
- Kills moss and algae
- See results in hours
- Effective alternative to conventional selective herbicides

### Use Rate

Mix one part FIESTA with 24 parts water (5 oz. in 1 gallon of water).

**Broadcast Treatment:** Apply the mixed solution at a rate of 2.5–10 gallons/1000 ft<sup>2</sup>. Uniform coverage is important.

**Spot Treatment:** Thoroughly spray weeds to point of runoff using any standard handheld or backpack sprayer. Use a course nozzle setting to reduce drift. Repeat treatment in 3 to 4 weeks for best results.\*

### Available in:

- 1 gallon jugs (4 per case)
- 2.5 gallon jugs (2 per case)
- 30 gallon drum
- 200 gallon tote

\*Fiesta can often be used in areas where there are pesticide bans. Check with your local municipality if there is a pesticide ban in place.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read the entire label before use.
