

FiNALSAN[®]

HERBICIDE

Non-Selective Moss and Algae Killer

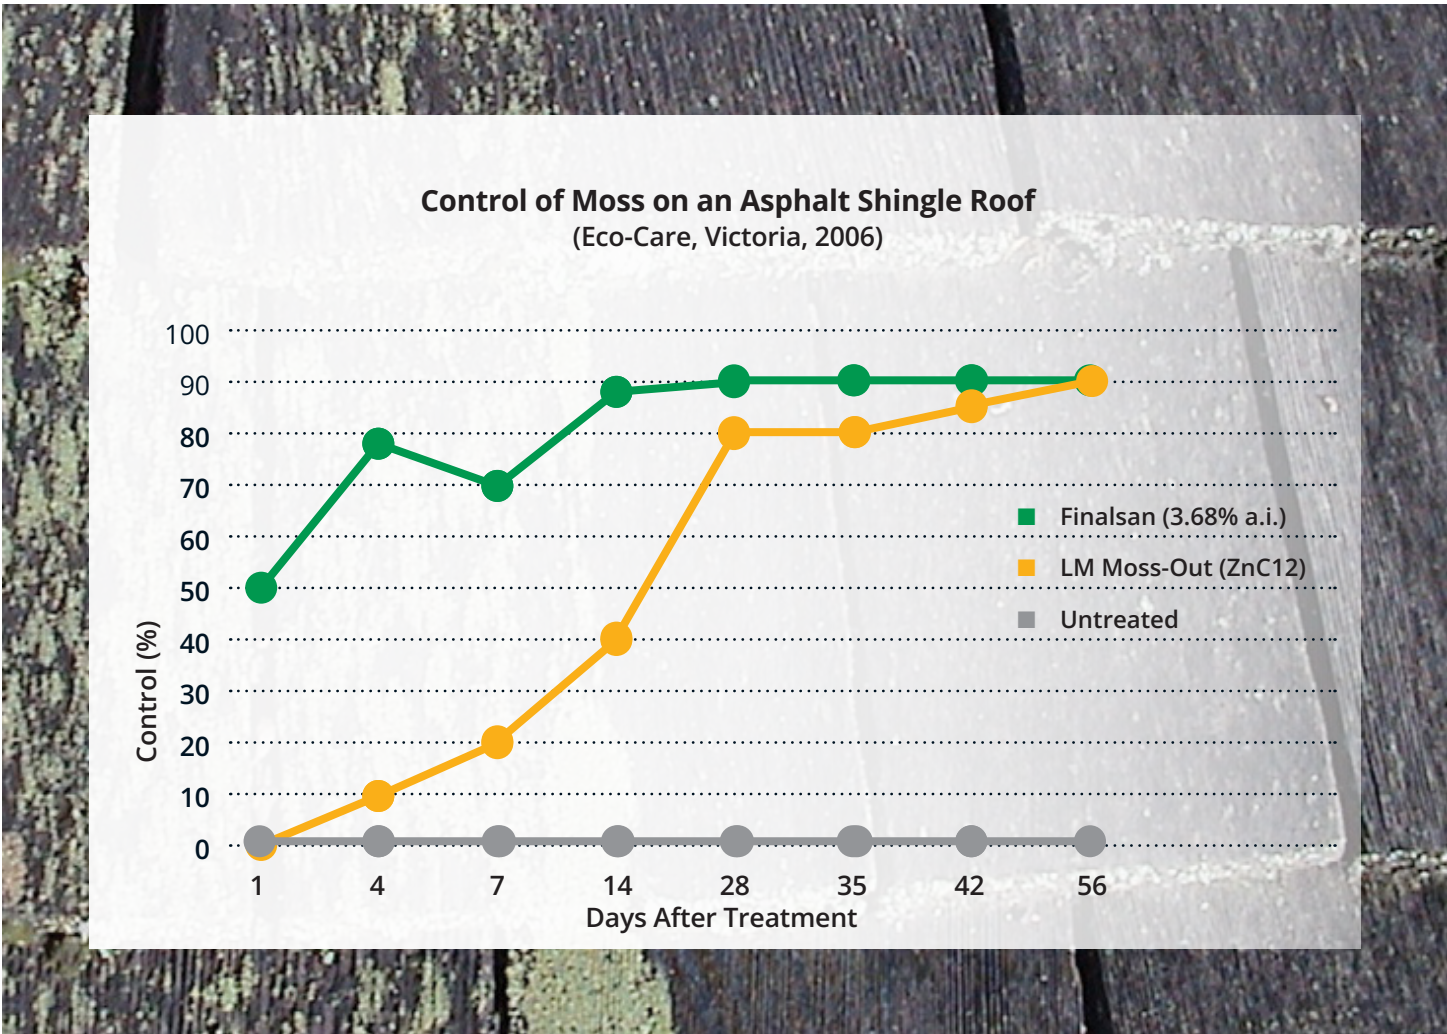

Active Ingredient: Ammonium soap of fatty acids 22.10%

Finalsan Herbicide is a patented fast-acting weed, grass, algae, and moss killer. Using a specially formulated, non-staining, ammonium soap of fatty acids, Finalsan is a non-selective herbicide that controls or suppresses many common annual, biennial, and perennial weeds.

- Mix 1 part Finalsan with 19 parts water or 55mL in 1 L of water. Apply the spray solution at a rate of 100-500 mL/m².
- Apply with any standard backpack or handheld sprayer. Thoroughly spray moss and algae.
- Expect damage to the moss or algae in a few hours to two days after application.
- Use on moss and algae around and on buildings, roofs, decks, sidewalks, fences, bark mulch, driveways, patios and gravel.
- Avoid spraying desirable plants. Not to be applied to moss or algae in lawns.
- Thoroughly clean equipment after use.

- Fast-acting: see results in hours
- Long-lasting: effects may last up to one year
- Non-staining: can be used on bricks, asphalt, concrete and wood
- Biodegradable: no harmful residue
- Low toxicity: for use where pesticide bans exist
- Rainfast: in three hours
