

# FIREWORXX<sup>®</sup>

## HERBICIDAL SOAP

Active Ingredient: Ammonium soap of fatty acids 22.10%

FireWorxx Herbicidal Soap is a patented fast-acting weed, grass, algae, and moss killer. Using a specially formulated, non-staining, ammonium soap of fatty acids, FireWorxx is a non-selective herbicide that controls or suppresses many common annual, biennial, and perennial weeds.

### Mode of Action

Herbicidal soaps penetrate the waxy cuticle of plants, causing the plant to dehydrate and die. Free fatty acids accumulate in plant cells and cause intracellular damage leading to cell collapse. Activity is non-selective and will kill plants the soap comes into contact with, but will not translocate to underground portions of the plant or harm the bark of mature, woody plants.

### Pests Affected

FireWorxx is effective on grass, chickweed, corn spurry, dandelion, groundsel, lamb's-quarters, mouse-eared chickweed, mustards, plantain, round leaved mallow, moss and algae.

### Use Sites

Use on weeds within vegetable and flower gardens, landscaped areas, lawns (for spot treatment only), in the vicinity of small fruits and fruit trees, around and

on buildings, sidewalks, fences, bark mulch, driveways, patios and gravel.

Use on moss and algae, around and on buildings, roofs, decks, sidewalks, fences, bark mulch, driveways, patios and gravel. FireWorxx can even be used in cool weather. Areas can be planted five days after treatment.

### Reduced Risk

FireWorxx leaves no harmful residue in the soil. It won't stain bricks, concrete or asphalt and people and pets can reenter areas once spray dries.

Read the entire label before use.
